Company Logo

A link back "home" provides consistency and immediate brand recognition.

Filter Settings

Choose to see the most important items – filter by time, location or product sold.

Data Filter

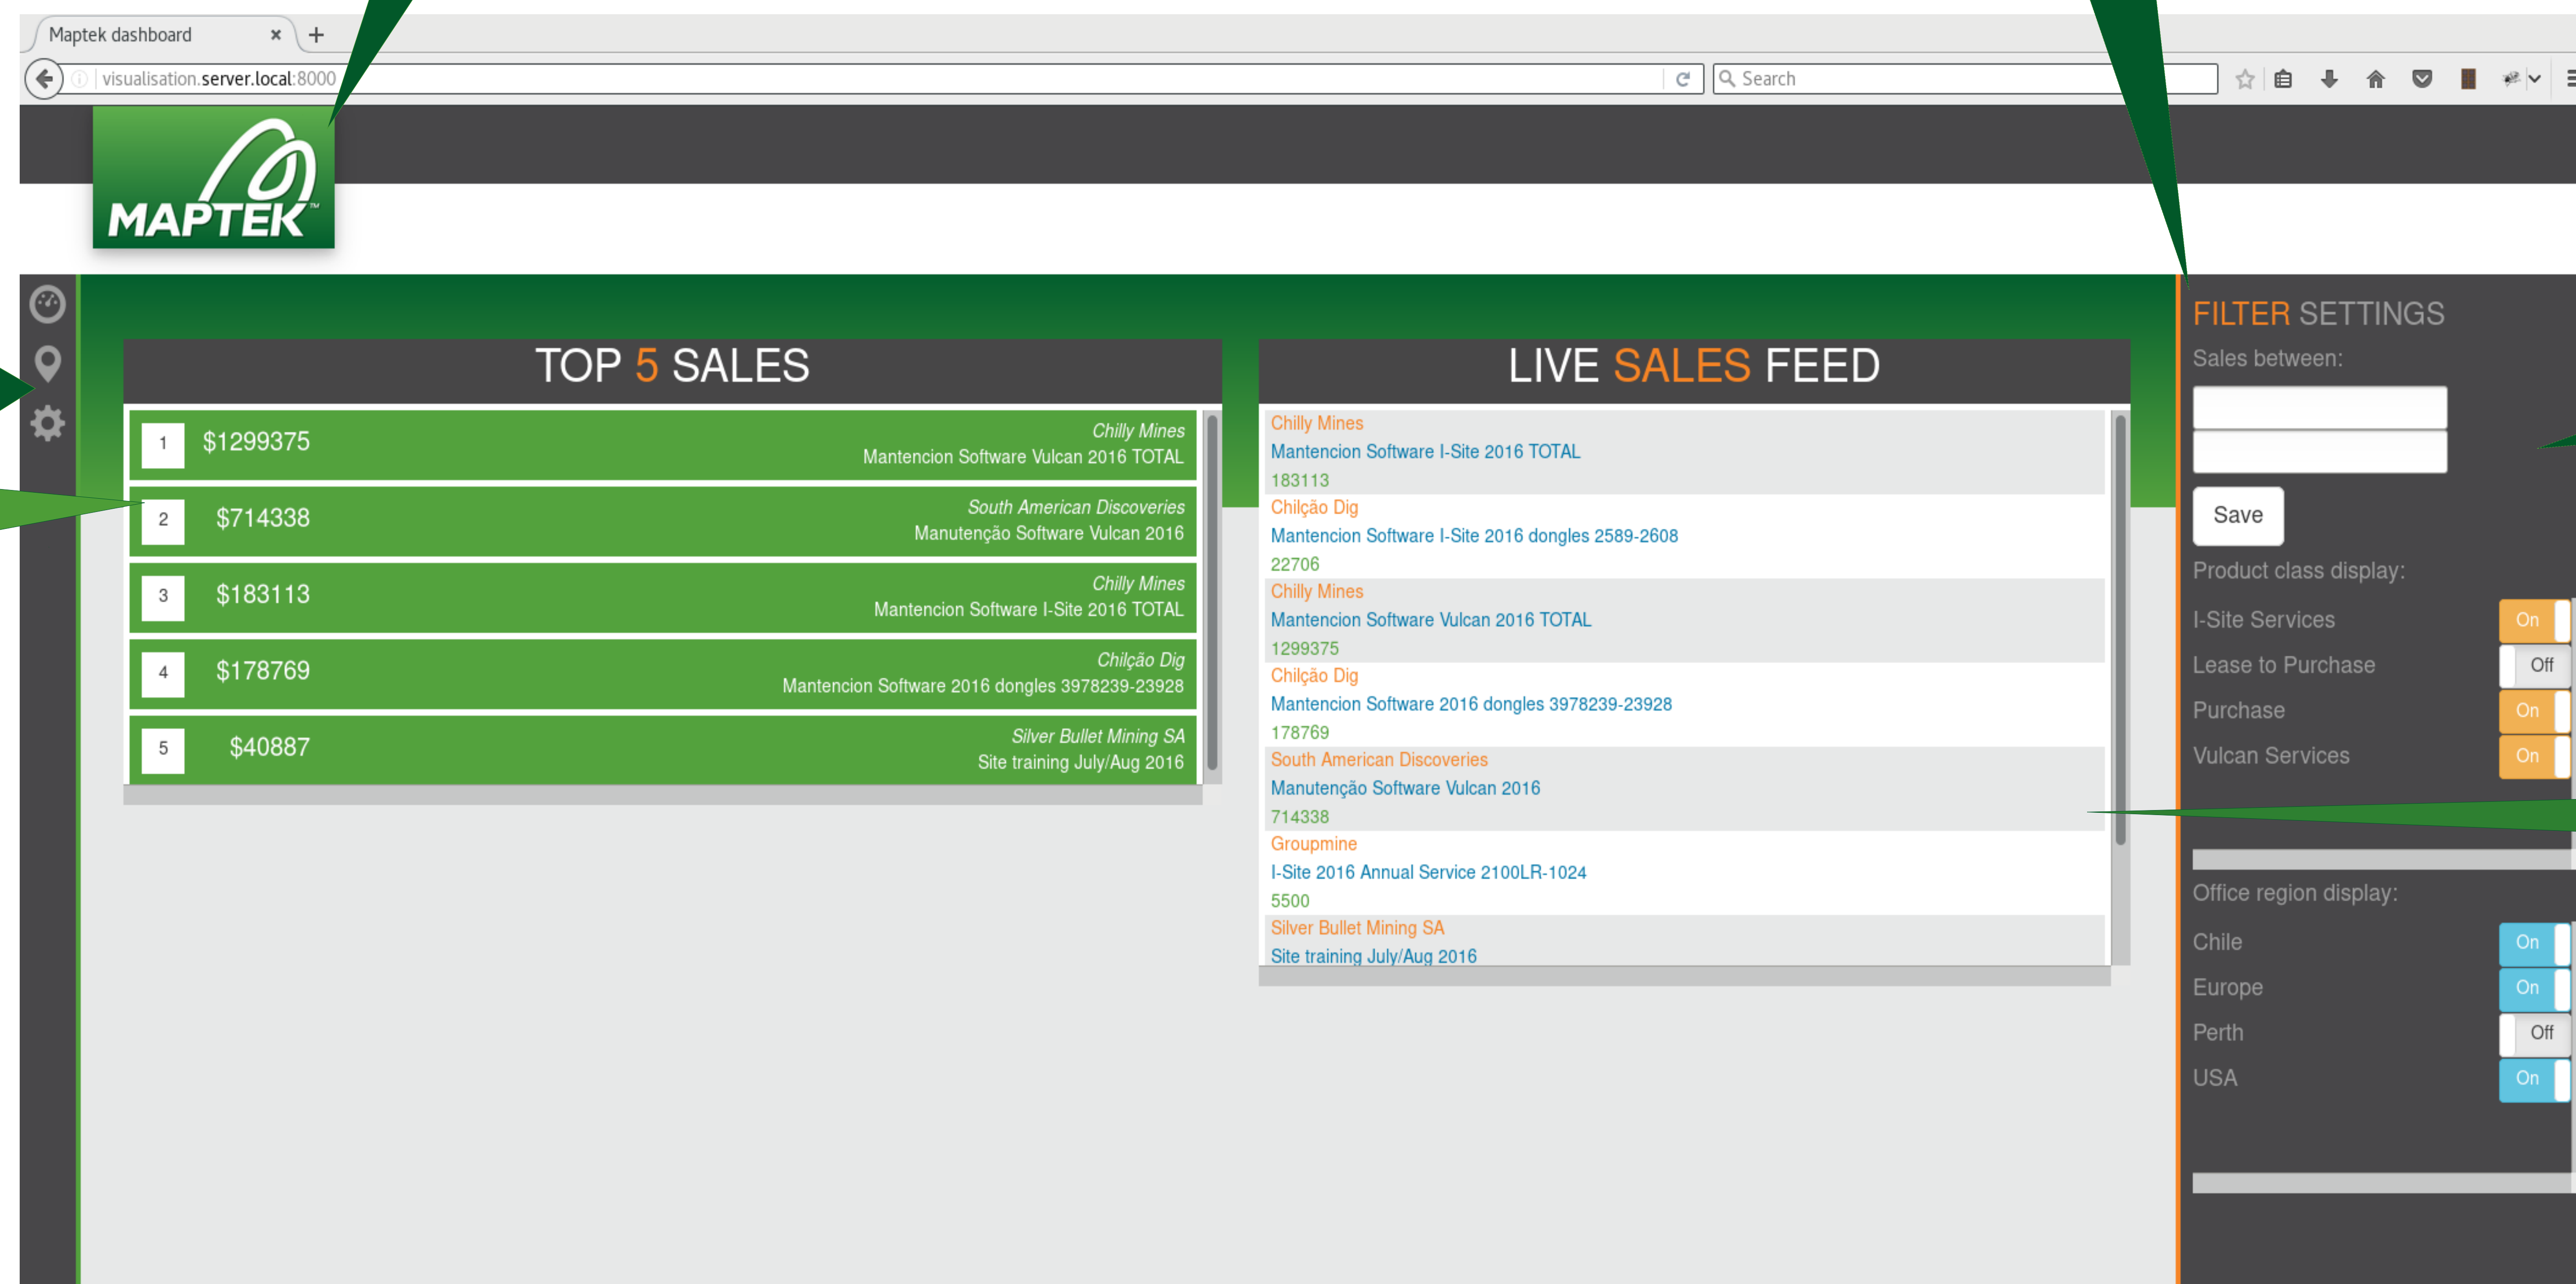

- Automatically determined from sales data
- Filter by multiple categories
- Select any suitable timeframe
- Pick the product that is the team's area of expertise
- Customise the view for a local branch's office

Top-5

- Intuitive rank system
- Visualise highest-profit contracts
- Motivate staff by showing off their achievements
- See high-demand products
- See the current company direction at a glance – for example, which products sell well and need more support staff

Real-Time Feed

- Keep up-to-date on the most recent contracts activity
- Allows staff to gain an appreciation of all sales closed within the company
- Manages "bursty" data by slowing down adding records in order to the feed

The screenshot shows a web browser displaying the Maptek dashboard. The dashboard includes a sidebar on the left with settings for update frequency and currency. The main content area is divided into two sections: 'TOP 5 SALES' and 'LIVE SALES FEED'. The 'TOP 5 SALES' section displays a table of the highest sales, and the 'LIVE SALES FEED' section displays a stream of recent sales. A 'FILTER SETTINGS' panel is visible on the right, allowing users to filter sales by time, location, and product class.

Rank	Amount	Product/Location
1	\$1299375	Chilly Mines Mantencion Software Vulcan 2016 TOTAL
2	\$714338	South American Discoveries Manutenção Software Vulcan 2016
3	\$183113	Chilly Mines Mantencion Software I-Site 2016 TOTAL
4	\$178769	Chilção Dig Mantencion Software 2016 dongles 3978239-23928
5	\$40887	Silver Bullet Mining SA Site training July/Aug 2016

Features, Implementation and Design

Portability

- Web interface with two presentation modes – for both a lobby screen and the office user
- Python + Django webserver stack deployed anywhere via Docker
- Versatile JSON files are used to transfer data from the sales database
- Client-side JavaScript reduces server load

Design

- Minimalistic, uncluttered interface
- Animation effects visually highlight most recent updates
- Interface colour scheme matches the company's colour scheme
