

Christoph's research

- Human Aspects of Software Engineering (2009-)
 - How do software developers use social media mechanisms?
 - Empirical studies, mostly qualitative
- Mining Software Repositories (2012-)
 - How can we get information to developers when and where they need it?
 - Natural language processing
 - Machine Learning
 - Software documentation
 - Summarization
 - ...

Third International Workshop on Dynamic Software Documentation (DySDoc3)

Hosted by the IEEE International Conference on
Software Maintenance and Evolution (ICSME 2018)

The DySDoc3 workshop will host the **First Software Documentation Generation Challenge (DocGen)**, which aims to spur research on automation of software documentation generation. Participation in the challenge involves developing a prototype tool and entering it in a competition. The competition will feature a live, juried tool evaluation, presentations of the best approaches, and a poster session. The extended summaries describing the entries will be published in the ICSME proceedings. The best entries will be recognized with awards.

July 20, 2018 - Qualifier submissions

July 27, 2018 - Notifications of qualifiers

August 3, 2018 - Camera-ready version for accepted challenge entries

Markus' research

- What does Markus do?
 - optimisation theory: how long until...
 - optimisation algorithms: how to navigate configuration spaces
 - optimisation applications: smartphone apps, wave energy, water networks, ...

If there is one thing that I'd like to remember: I optimise – in teams (90+ co-authors).

<https://cs.adelaide.edu.au/~markus/>

- Tim Menzies @ MSR, 29 May, 11am, room E4
 - “Data-Driven Search-Based Software Engineering”
 - result of a NII Shonan in Dec'17
 - MSR methods can “supercharge” SBSE → learn from others
 - SBSE methods can “supercharge” MSR → do tuning
(make Oz-SE great ... make Oz-SE even greater!!!)

Genetic Improvement of Software Workshops (2x in 2018!)

- 4th edition @ ICSE (by UCL and friends, 2 June):
<http://geneticimprovementofsoftware.com/>
- 5th edition @ GECCO (Markus and friends, perseverance paid off, July in Kyoto):
<http://www.cs.stir.ac.uk/events/gecco-gi-2018/>

Genetic ... *what?* → Kind of like Search-Based Software Engineering (SBSE), but mostly close to the code.

Let an algorithm deal with configuration optimisation / specialisation of code / ...,
(1) because we don't teach it, (2) because we can.

TODOs

- Slides from yesterday and today
 - Send to me and I'll put them on the event website
- Online group for Australian SE researchers
 - Facebook, Google Groups, ... -- Volunteer?
- Australian SE website
 - Summaries of current research interests -- Volunteer?
- Next event
 - Volunteer?
- Collaboration opportunities
 - co-supervision, grant proposals, hosting conferences, ...
