

Main Achievements

Scholarship, Research, Creative Activity

- I have attracted funding with a total value of over AUD 10 million (over AUD 1,400,000 as the lead investigator, including an ARC DECRA and an ARC LP).
- I have co-authored 150+ articles with 200+ colleagues (e.g. from Max-Planck-Institute, Hasso-Plattner-Institute, and University College London). So far, I have published 9x A*-ranked papers and 49 A-ranked papers (scale: A*/A/B/C/unranked). 21 times I have been first author, and 49 times last author.
- My h-index is 29 with over 2500 citations (Google Scholar), with the number of citations per year steadily increasing.
- I have been invited four times to prestigious invitation-only seminars on hot topics in computer science: 5x Dagstuhl, 2x NII Shonan, 1x Lorentz. Also, I have been leading organiser of a NII Shonan meeting. I have been opening keynote speaker at the 2nd Workshop on System Integration of Renewable Energy (WSIRE) 2014, at the Symposium on Evolutionary Computation 2017, and invited speaker at the Evolutionary Computation in Practice (GECCO 2019).
- Promotion to Associate Professor after 7 years of completing the PhD.
- I have received the University Doctoral Research Medal 2013, which has been the first medal for the School of Computer Science.
- So far, I have been awarded three best paper awards, a best poster award, and a best presentation award. Across three conference competitions, I have reached 3rd, 2nd, and 1st places.
- I am currently involved in one ARC DP around algorithmic aspects in optimisation, in an active ARC ITTC and in an active PRIF RCP on ore resource modelling and optimisation in the mining industry. Also, I am pursuing the commercialisation of research outcomes as a former CSIRO ON Prime participant.

Teaching, Including Supervision

- I have taught 16 different subjects since 2005 and supervised a substantial number of projects. I have led a group to develop half of a massive open online course. Also, I have developed a 4th-year university course on Search-Based Software Engineering, and I have used the material in teaching in Australia, China, and Portugal.
- Outstanding perception by students: in "Markus Wagner is an effective university teacher" I scored 2x 100% broad agreement in 2013, 3x 100% in 2014, 4x 100% in 2015, 3x 100% in 2016, 1x in 100% in 2017, 1x in 100% in 2018, 4x 100% in 2020, and 6x 100% in 2021.
- Above University-average SELT scores and fantastic comments, and course improvements as manifested in improved course SELT scores and reduced failure rates for "Introduction to Programming".
- Higher degree research student supervision: 4 PhD students graduated, 7 PhD students ongoing, 15 Masters or Honours students supervised or currently supervising.
- Projects with coursework students resulted in the publication of eight refereed articles (seven A-ranked).
- Team leadership: since 2016, I have had seven computer science students working on topics related to my ARC DECRA, and eight computer science students on topics related to my collaboration with the School of Mechanical Engineering around wave energy. This has set the solid foundations for past and current grant proposals.
